Author index

Abbadie, C., Honoré, P., Fournié-Zaluski, M.-C., Roques, B.P. and Besson, J.-M.
Effects of opioids and non-opioids on c-Fos-like immunoreactivity induced in rat lumbar spinal cord neurons by noxious heat stimulation (258) 215
Abel, E.L. and Hannigan, J.H.
The immobility response in the forced swim test: paradoxical effect of imipramine (258) 261
Adachi, H., see Chang, T.-h. (258) 77
Adler-Graschinsky, E., see Lorenzo, P.S. (258) 253
Asano, M., see Yokota, Y. (258) 239

Badia, A., see Sallés, J. (258) 229
Balfagón, G., see Ferrer, M. (258) 103
Barjavel, M.J., Thorat, S.N. and Bhargava, H.N.
Enhancement of a κ-opioid receptor agonist-induced analgesia by L-tyrosine and L-tryptophan (258) 173
Belleau, B., see Lemaire, S. (258) 111
Berthelot, A., see Laurant, P. (258) 167
Besson, J.-M., see Abbadie, C. (258) 215
Bhargava, H.N., see Barjavel, M.J. (258) 173
Bocanera, L.V., see Pisarev, M.A. (258) 33
Boot, J.R.
Differential effects of ω-conotoxin GVIA and MVIIC on nerve stimulation induced contractions of guinea-pig ileum and rat vas deferens (258) 155
Boyet, S., see Nehlig, A. (258) 57
Broccardo, M. and Improta, G.
Sauvagine-induced hypothermia: evidence for an interaction with the dopaminergic system (258) 179
Brugger, F., see Lepre, M. (258) 23
Brunissen, A., see Lavielle, S. (258) 273
Burcher, E. and Stamatakos, C.
Septide but not substance P stimulates inhibitory neurons in guinea-pig ileum (258) R9
Butta, N.V., see Lorenzo, P.S. (258) 253

Carpenter, T.G., see Gardiner, P.J. (258) 95
Carruette, A., see Lavielle, S. (258) 273
Chang, T.-h., Adachi, H., Mori, N., Saito, I. and Okuyama, T.
Effects of a pyranocoumarin compound isolated from a Chinese medicinal plant on ischemic myocardial dysfunction in anesthetized dogs (258) 77
Chassaing, G., see Lavielle, S. (258) 273
Chester, H.A., see Pisarev, M.A. (258) 33
Chiba, S., see Fujiwara, T. (258) 195
Cohen, M.L., see Cox, D.A. (258) 265
Collins, K.A., see Tseng, L.F. (258) R1
Connelly, C.D., see Raffa, R.B. (258) R5
Cox, D.A. and Cohen, M.L.
Age-related alterations in sensitivity of muscarinic and serotonergic responses of guinea pig trachea to removal of extracellular Ca^{2+} (258) 265
Cruz, S.L., Fernández-Guasti, A. and Villarreal, J.E.
Cardiovascular effects of different schedules of nicotine administration on spinal rats: influence of pentobarbital (258) 39
Cuthbert, N.J., see Gardiner, P.J. (258) 95

Damase-Michel, C., Giraud, P., Portolan, G., Montastruc, J.-L., Montastruc, P. and Tran, M.-A.
Effects of insulin on the release of neuropeptide Y, [Met^5]enkephalin and catecholamines from dog adrenal medulla (258) 277
Darius, H., Michael-Hepp, J., Thierauch, K.-H. and Fisch, A.
Inhibition of human platelets and polymorphonuclear neutrophils by the potent and metabolically stable prostaglandin D_2 analog ZK 118.182 (258) 207
Daval, J.-L., see Nehlig, A. (258) 57
De Pascual, R., see Salas, E. (258) 47
De Waele, J.-P. and Gianoulakis, C.
Enhanced activity of the brain β-endorphin system by free-choice ethanol drinking in C57BL/6 but not DBA/2 mice (258) 119
Dixon, W.R., see Salas, E. (258) 47
Dobozy, A., see Kemény, L. (258) 269
Drekić, D., see Jovanović, A. (258) 185

Encabo, A., see Ferrer, M. (258) 103
Evans, R.H., see Lepre, M. (258) 23

Farkas, B., see Kemény, L. (258) 269
Fernández-Guasti, A., see Cruz, S.L. (258) 39
Ferrer, M., Encabo, A., Marín, J. and Balfagón, G.
Treatment with the anabolic steroid, nandrolone, reduces vasoconstrictor responses in rabbit arteries (258) 103
Fisch, A., see Darius, H. (258) 207
Fitzgerald, M.F., see Gardiner, P.J. (258) 95
Fournié-Zaluski, M.-C., see Abbadie, C. (258) 215
Francis, H.P., see Gardiner, P.J. (258) 95
Fujiwara, T. and Chiba, S.
Mechanisms of augmented vascular responses to histamine in atherosclerotic rabbit common carotid arteries (258) 195

García, A.G., see Salas, E. (258) 47
Gardiner, P.J., Cuthbert, N.J., Francis, H.P., Fitzgerald, M.F., Thompson, A.M., Carpenter, T.G., Patel, U.P., Newton, B.B., Mohrs, K., Müller-Peddinghaus, R. and Taylor, W.A.
Inhibition of antigen-induced contraction of guinea-pig airways by a leukotriene synthesis inhibitor, BAY x1005 (258) 95
Garret, C., see Lavielle, S. (258) 273
Garzón, J., see Sánchez-Blázquez, P. (258) 159
Gianoulakis, C., see De Waele, J.-P. (258) 119
Giraldo, J., see Sallés, J. (258) 229
Giraud, P., see Damase-Michel, C. (258) 277
Grbović, L., see Jovanović, A. (258) 185
Grundemar, L., Krstenansky, J.L. and Håkanson, R.
Neuropeptide Y and truncated neuropeptide Y analogs evoke histamine release from rat peritoneal mast cells. A direct effect on G proteins? (258) 163

Håkanson, R., see Grundemar, L. (258) 163
Hannigan, J.H., see Abel, E.L. (258) 261
Hariton, C.
Ocular hypotension induced by topical dopaminergic drugs and phosphodiesterase inhibitors (258) 85
Hart, S.L., see Oluyomi, A.O. (258) 131
Hayakawa, H., see Koumi, S.-i. (258) 281
Hellman, B., see Saha, S. (258) 145
Honoré, P., see Abbadie, C. (258) 215

Improta, G., see Broccardo, M. (258) 179
Inamura, N., see Yokota, Y. (258) 239

Jolicoeur, F.B., see Lemaire, S. (258) 111
Jovanović, A., Grbović, L., Drekić, D. and Novaković, S.
Muscarinic receptor function in the guinea-pig uterine artery is not altered during pregnancy (258) 185
Juvenal, G.J., see Pisarev, M.A. (258) 33

Kampine, J.P., see Tseng, L.F. (258) R1
Kan, S., Niwa, M. and Taniyama, K.
Specific receptor for vasoactive intestinal contractor in myenteric cholinergic neurones (258) 139
Karácsony, G., see László, F. (258) 15
Kemény, L., Kenderessy, A.Sz., Olasz, E., Michel, G., Ruzicka, T., Farkas, B. and Dobozy, A.
The interleukin-8 receptor: a potential target for antipsoriatic therapy? (258) 269
Kenderessy, A.Sz., see Kemény, L. (258) 269
Koumi, S.-i., Sato, R. and Hayakawa, H.
Modulation of voltage-dependent inactivation of the inwardly rectifying K^+ channel by chloramine-T (258) 281
Krawiec, L., see Pisarev, M.A. (258) 33
Krstenansky, J.L., see Grundemar, L. (258) 163

László, F., Karácsony, G., Pávó, I., Varga, C., Rojik, I. and László, F.A.
Aggressive role of vasopressin in development of different gastric lesions in rats (258) 15
László, F.A., see László, F. (258) 15
Laurant, P. and Berthelot, A.
Influence of endothelium on Mg^{2+}-induced relaxation in noradrenaline-contracted aorta from DOCA-salt hypertensive rat (258) 167
Lavielle, S., Brunissen, A., Carruette, A., Garret, C. and Chassaing, G.
Highly potent substance P antagonists substituted with β-phenyl- or β-benzyl-proline at position 10 (258) 273
Lemaire, S., Belleau, B. and Jolicoeur, F.B.
Agonist and antagonist opioid activity of axial and equatorial conformations of *S*-methyl- and *S*-allyl-morphinans (258) 111
Lepre, M., Olpe, H.-R., Evans, R.H. and Brugger, F.
Physiological and pharmacological characterization of the spinal tachykinin NK_2 receptor (258) 23
López, M.G., see Salas, E. (258) 47
Lorenzo, P.S., Butta, N.V. and Adler-Graschinsky, E.
Effects of L-glutamate on the responses to nerve stimulation in rat isolated atria (258) 253

Maragoudakis, M.E., see Tsopanoglou, N.E. (258) 151
Marín, J., see Ferrer, M. (258) 103
Marona-Lewicka, D. and Nichols, D.E.
Behavioral effects of the highly selective serotonin releasing agent 5-methoxy-6-methyl-2-aminoindan (258) 1
Martinez, R.P., see Raffa, R.B. (258) R5
Michael-Hepp, J., see Darius, H. (258) 207
Michel, G., see Kemény, L. (258) 269
Mohrs, K., see Gardiner, P.J. (258) 95
Montastruc, J.-L., see Damase-Michel, C. (258) 277
Montastruc, P., see Damase-Michel, C. (258) 277
Mori, N., see Chang, T.-h. (258) 77
Müller-Peddinghaus, R., see Gardiner, P.J. (258) 95
Muskardin, D.T., see Wallace, D.R. (258) 67

Nakahara, K., see Yokota, Y. (258) 239
Nehlig, A., Daval, J.-L. and Boyet, S.
Effects of selective adenosine A_1 and A_2 receptor agonists and antagonists on local rates of energy metabolism in the rat brain (258) 57
Newton, B.B., see Gardiner, P.J. (258) 95
Nichols, D.E., see Marona-Lewicka, D. (258) 1
Niwa, M., see Kan, S. (258) 139
Notsu, Y., see Yokota, Y. (258) 239
Novaković, S., see Jovanović, A. (258) 185

Okuyama, T., see Chang, T.-h. (258) 77
Olasz, E., see Kemény, L. (258) 269
Olpe, H.-R., see Lepre, M. (258) 23
Oluyomi, A.O., Poole, S., Smith, T.W. and Hart, S.L.
Antinociceptive activity of peptides related to interleukin-1β-(193–195), Lys-Pro-Thr (258) 131
Ono, T., see Yokota, Y. (258) 239

Patel, U.P., see Gardiner, P.J. (258) 95
Pávó, I., see László, F. (258) 15
Pipili-Synetos, E., see Tsopanoglou, N.E. (258) 151
Pisarev, M.A., Krawiec, L., Juvenal, G.J., Bocanera, L.V., Pregliasco, L.B., Sartorio, G. and Chester, H.A.
Studies on the goiter inhibiting action of iodolactones (258) 33
Poole, S., see Oluyomi, A.O. (258) 131
Portolan, G., see Damase-Michel, C. (258) 277
Pregliasco, L.B., see Pisarev, M.A. (258) 33

Raffa, R.B., Martinez, R.P. and Connelly, C.D.
G-protein antisense oligodeoxyribonucleotides and μ-opioid supraspinal antinociception (258) R5
Rojik, I., see László, F. (258) 15
Roques, B.P., see Abbadie, C. (258) 215
Ruzicka, T., see Kemény, L. (258) 269

Saha, S. and Hellman, B.
Sulfonylureas mimic glucose in stimulating the uptake of Na^+ in pancreatic islets exposed to ouabain (258) 145
Saito, I., see Chang, T.-h. (258) 77
Salas, E., López, M.G., Villarroya, M., Sánchez-García, P., De Pascual, R., Dixon, W.R. and García, A.G.
Endothelium-independent relaxation by 17-α-estradiol of pig coronary arteries (258) 47
Sallés, J., Giraldo, J. and Badia, A.
Analysis of agonism at functional prejunctional α_2-adrenoceptors of rat vas deferens using operational and null approaches (258) 229
Sánchez-Blázquez, P. and Garzón, J.
Mastoparan reduces the supraspinal analgesia mediated by μ/δ-opioid receptors in mice (258) 159
Sánchez-García, P., see Salas, E. (258) 47
Sartorio, G., see Pisarev, M.A. (258) 33
Sato, R., see Koumi, S.-i. (258) 281
Schäfer, S. and Walland, A.
Staurosporine inhibits the anaphylactic reaction of the isolated guinea-pig heart (258) 247
Smith, T.W., see Oluyomi, A.O. (258) 131
Stamatakos, C., see Burcher, E. (258) R9

Taniyama, K., see Kan, S. (258) 139
Taylor, W.A., see Gardiner, P.J. (258) 95
Thierauch, K.-H., see Darius, H. (258) 207
Thompson, A.M., see Gardiner, P.J. (258) 95
Thorat, S.N., see Barjavel, M.J. (258) 173
Tran, M.-A., see Damase-Michel, C. (258) 277
Tseng, L.F., Collins, K.A. and Kampine, J.P.
Antisense oligodeoxynucleotide to a δ-opioid receptor selectively blocks the spinal antinociception induced by δ-, but not μ- or κ-opioid receptor agonists in the mouse (258) R1
Tsopanoglou, N.E., Pipili-Synetos, E. and Maragoudakis, M.E.
Leukotrienes C_4 and D_4 promote angiogenesis via a receptor-mediated interaction (258) 151

Varga, C., see László, F. (258) 15
Villarreal, J.E., see Cruz, S.L. (258) 39
Villarroya, M., see Salas, E. (258) 47

Wallace, D.R., Muskardin, D.T. and Zahniser, N.R.
Pharmacological characterization of [^{3}H]idazoxan, [^{3}H]RX821002 and *p*-[^{125}I]iodoclonidine binding to α_2-adrenoceptors in rat cerebral cortical membranes (258) 67
Walland, A., see Schäfer, S. (258) 247
Watanabe, M., see Yokota, Y. (258) 239

Yamamoto, Y., see Yokota, Y. (258) 239
Yokota, Y., Inamura, N., Asano, M., Yamamoto, Y., Nakahara, K., Notsu, Y., Ono, T. and Watanabe, M.
Effect of FR128998, a novel PAF receptor antagonist, on endotoxin-induced disseminated intravascular coagulation (258) 239

Zahniser, N.R., see Wallace, D.R. (258) 67
